ATLANTIC

ATLANTIC. Your floor can do MO.RE!

Take more.
Endure more.
Withstand more.

Laminate has been one of the most popular floor coverings for decades and has been continuously developed. Laminate floors from KronoOriginal® are both popular everyday products for private living spaces and robust partners for commercial premises.

They are hard-wearing, abrasion-resistant, easy to install and therefore versatile in use.

With Moisture Resistance from KRONOSPAN, or MO.RE! for short, laminate is even more practical for everyday use.

Thanks to MO.RE! technology, floors are more resistant to moisture. And that's a good thing. After all, minor everyday mishaps happen to all of us.

Atlantic floors are certified with the Blue Angel ecolabel* – a recognised sign of dedication to protecting people and the environment.

www.blauer-engel.de/uz176

*For further information: www.blauer-engel.de/en.

ATLANTIC takes more – thanks to MO.RE!

- 💧 **Protection from microscratches** – the robust and hard-wearing surface masters the everyday challenges of modern family life.
- 💧 **Antibacterial comfort** inhibits the growth* of bacteria on the floor and protects you and your loved ones from unpleasant surprises. *Bacteria tested: *Staphylococcus aureus*.
- 💧 **Lightfast and colorfast** – no fading if exposed to sunlight according to level 6, the highest on the blue wool scale

How MO.RE! technology works

MO.RE! technology is based on a new substrate formulation.

This makes the floor significantly less prone to swelling and therefore more resistant to the effects of moisture than conventional laminate floors.

Spilled a drink? Knocked over the mop bucket? Has a flower pot leaked onto the floor? There's no reason to panic: floors featuring MO.RE! technology can withstand such mishaps.

You can wipe up the liquid in peace and don't need to worry about whether your floor has been damaged. MO.RE! makes this possible!

ATLANTIC

More than just moisture-resistant

1clic 2go pure

Atlantic floors are installed in no time at all with the 1clic 2go pure installation system, which provides a friction-locked connection and does not require any plastic seams.

Light-resistant

Atlantic floors are light-resistant according to level 6, the highest on the blue wool scale, i.e. even with prolonged exposure to sunlight, they remain colorfast and do not fade.

4-sided beveled edges

The planks have 4-sided beveled edges to ensure an authentic floorboard appearance.

Microscratch protect

The exceptionally robust surface of the Atlantic 12 collection with abrasion class AC5 protects your floor even more reliably against microscratches that can be caused by heavy mechanical loads.

Pet proof

Thanks to their robust surface, MO.RE! technology and the antibacterial comfort, Atlantic floors are eminently suitable for households with pets.

Authentic Embossed

Our Authentic Embossed textures are particularly natural. They are characterized by elegant contrasts and exciting multi-gloss effects, which reflect the light differently and emphasize the depth of the structure in a very special way. The tactile structure of the synchronous pores follows the grain of the decor and thus reproduces the character of natural wood.

Antibacterial comfort

It goes without saying that keeping your floor as clean and bacteria-free as possible is important to you. The A.B.C. surface* does not provide a basis for bacteria to grow. With regular cleaning, you and your family can enjoy everyday life without any worries.

* Bacteria tested: Staphylococcus aureus.

MO.RE! guarantee

Benefit from a 20-year guarantee on Atlantic 8 collection floors and even a 30-year guarantee on Atlantic 12 collection floors for living areas*. Whichever floor you choose: **You can definitely rely on MO.RE! Guaranteed!**

*For living areas according to the guarantee conditions at www.krono-original.com.

MO.RE! reliability

Spilled a glass of water or had a similar mishap? No problem: floors featuring MO.RE! technology offer you as much as **48 hours of splash-water protection**.*

*According to works standard specification KRONOSPAN WN-103, www.floor-with-more.com.

MO.RE! for the environment

MO.RE! is made using only wood from sustainably managed forests. And KRONOSPAN does not use any PVC in flooring with the MO.RE! technology, demonstrating our commitment to environmental stewardship. MO.RE! substrates are CO₂-neutral, as processing a tree to make these boards emits less CO₂ than the tree has stored in its lifetime.

MO.RE! from life

Floors featuring MO.RE! technology can withstand even more: with use utilization classes 23 and 32 as well as abrasion classes AC4 and AC5, they are suitable for all living areas with intensive use, and Atlantic 12 is even suitable for commercial areas subject to intensive use.

Your home, your office, your perfect floor

The floors in the Atlantic 12 collection all have a high-quality Authentic Embossed texture, i.e. the synchronous pores follow the grain of the oak decors in their

tactile structure. From the light Iceberg Oak to the cozy Inca Carpenter Oak and the dark Bedrock Oak, there is a floor to suit every taste and application.
